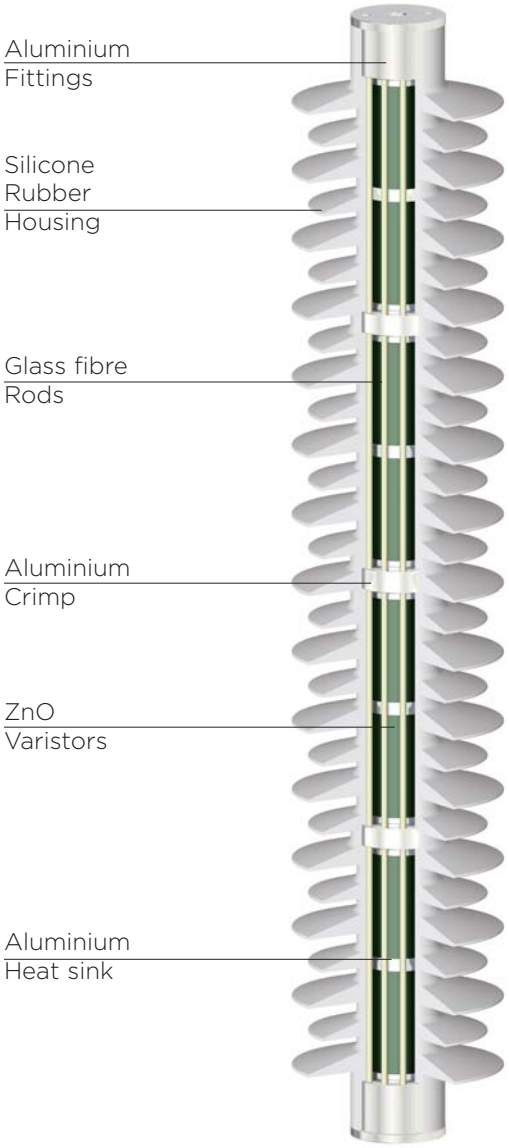
Polymeric Single Column Station Class Surge Arresters

Generic technical data

		PAA	PBA	PCA
System Voltage U_{max}	Kv	72.5	170	420
System Voltage U_{nom}	Kv	66	150	400
Rated discharge current	kA	10	10	10
High current impulse (4/10 µs)	kA	100	100	100
Classification		2	2	3
Energy Capability at Ur	kJ/kV	4.1	6.4	7.8
Short circuit rating	kA	40	40	65
Mechanical strength*				
Safe long-term load (SLL)	kNm	0.25	0.6	2.0
Safe short-term load (SSL)	kNm	0.35	1.0	2.5

* As defined in IEC60094-4, Edition2.2, 2009-05



Qualification testing:

Decades of arrester and materials, design and development experience has been combined to create the cage design surge arrester series. The basic construction comprises ZnO varistors assembled within a open cage design. The following IEC60099-4 design type tests have been carried out on the polymeric single column surge arresters.

- Insulation withstand tests on the arrester housing.
- Residual voltage test.
- Long duration current impulse withstand test.
- Operating duty tests.
- Short-circuit tests.
- Internal partial discharge test.
- Bending moment test (Cantilever).
- Moisture ingress test.
- Weather Ageing Test.
- Power frequency voltage versus time characteristics on the arrester.
- Tracking and Erosion.
- UV testing.

PAA termination options

L1
M16 stud assembly

L2
Line Clamp to suit cables up to Ø16 mm

L5
Line Clamp to suit cables up to Ø35 mm

L6
Aluminium Stem
Ø30 x 80mm high

L21
4 Hole NEMA Pad

E1
2 x M10 x 20mm Hexagonal headed set screws and spring washers

E2
Earth Clamp to suit cables up to Ø16 mm

E5
Earth Clamp to suit cables from Ø16 mm to 35mm

M7
Pedestal Base with 3 x 15mm slots on 200mm - 254mm PCD

M8
Set of 3 Ø89 x 76 Polyfibre Base Insulators supplied with M7 pedestal base with 3 x 15mm slots on 200mm - 254mm PCD

Example: PAA11 60 L1 E1 M7

Arrester Housing
Voltage
Mounting
Earth Terminal
Line Terminal

Polymeric Single Column
Station Class Surge Arresters

SC12

SC13

SC14 / SC15

PAC-G

Temperature and Humidity sensor

The Tyco Electronics range of surge counters and monitoring instruments are fully tested for use with any manufacturers' ZnO surge arrester.

- The surge counters, are designed for installation in the earth connections of a single phase surge arrester.
- Fully weatherproofed and sealed for life they are housed in a one piece gravity die cast aluminum case, epoxy power coated to enhance its already high degree of resistance to surface corrosion.
- The glass viewing window (SC12 and SC13) is sealed in place, using a silicon rubber adhesive, and a desiccator is enclosed to ensure any residual moisture trapped during sealing is absorbed for the service life of the counter.
- Mounting is effected by means of an integrally cast lug at the rear of the case providing a single clearance hole for the galvanized steel M12 bolt supplied.

Available options:

SC12

The SC12 gives a visual indication of the quantity of surges the arrester has received; this is via an integrated 6 digit cyclometer.

The SC12 can be supplied with an auxiliary volt free contact rated at 1A - 250V for connection to remote signaling equipment.

SC13

The SC 13 provides the additional measurement of total leakage current. The analogue instrument provides a means of monitoring the leakage current through the surge arrester and over the surface of the surge arrester housing. Significant changes after installation may indicate deterioration in the surge arrester or a build up of surface contamination.

The SC13 can be supplied with an auxiliary volt free contact rated at 1A- 250V for connection to remote signaling equipment.

SC14 with PAC-G

The SC14 is the next generation in surge arrester monitoring, which enables the surge data to be recorded and transmitted wirelessly to a PAC-G (Programmable Access Device –Gateway) via an integrated Zigbee data link. This is then uploaded via a GPRS data link to a web server.

SC15 with PAC-G & Temperature / Humidity sensor

The SC15 intelligent surge counter monitoring system takes the design of the SC14 one step further, by allowing total leakage current, temperature and humidity conditions in addition to surge activity to be transferred. When installed with earth guard the data allows utilities to record lightning & switching surge and leakage current trends of each arrester being monitored.

About TE Connectivity

TE Connectivity is a global, $12.1 billion company that designs and manufactures over 500,000 products that connect and protect the flow of power and data inside the products that touch every aspect of our lives. Our nearly 100,000 employees partner with customers in virtually every industry – from consumer electronics, energy and healthcare, to automotive, aerospace and communication networks – enabling smarter, faster, better technologies to connect products to possibilities.

TE Energy – innovative and economical solutions for the electrical power industry: cable accessories, connectors & fittings, insulators & insulation, surge arresters, switching equipment, street lighting, power measurement and control.
